EDUCATION

University of Texas at Dallas

B.S in Computer Science

Richardson, TX

Expected 2026

- **Relevant Coursework:** Data Structures & Algorithms, Advanced Algorithm Design, Software Engineering, Systems Programming in UNIX, Computer Architecture, Probability & Statistics in CS, Programming Paradigms

WORK EXPERIENCE

Spectrum

Software Engineer Intern

May 2026 – August 2026

Greenwood Village, CO

- Built a RAG-based semantic search pipeline using vector embeddings and OpenSearch, cutting search times by **30%**
- Deployed a distributed Kubernetes service batching LLM calls via an OpenAI gateway, cutting token costs by **50%**
- Redesigned Spectrum's internal API gateway with GraphQL and Datadog observability, improving latency by **35%**

Imagine Communications

IT Specialist Intern

Jan 2025 – May 2026

Plano, TX

- Optimized Oracle/Salesforce SQL pipelines and ETL workflows, improving reporting and data retrieval speeds by **25%**
- Built interactive Power BI Dashboards monitoring **100+** device endpoints for real-time analytics/operational insights
- Automated infrastructure provisioning via Terraform to streamline deployments and reduce setup and scaling time
- Support IT operations: network troubleshooting, endpoint security, device provisioning, and onboarding automation

PROJECTS

Sentry Load | Go, Next.js/TypeScript, Redis, PostgreSQL, Prometheus/Grafana, Docker

July 2026 – Current

- Built a distributed load-testing platform in Go with Redis Streams, coordinating a multi-region worker fleet
- Added Prometheus/Grafana observability with capacity-aware admission control, cutting failed test runs by **40%**
- Detected and remediated an unauthenticated Redis exposure exploited by an automated attacker, adding authentication

NBA Muse | JavaScript, Turso/libSQL, DuckDB, SQLite, Next.js

August 2025 – September 2025

- Developed an NBA stats search engine returning box-score metrics for any player from 1997-2024 using Next.js/SQL
- Converted user queries into parameterized SQL via Next.js APIs; DuckDB ETL enables instant table/stat summaries

LEADERSHIP

Basketball Team Co-Captain

Filipino Student Association

August 2023 – August 2025

Richardson, TX

- Led a competitive basketball team, organizing practices, strategies, and game plans to drive team performance
- Placed **6th** in the Texas Tournament, Goodphil, fostering teamwork, open-ended collaboration, and camaraderie

Technical Operations Volunteer

Our Lady of Angels

December 2024 – Current

Allen, TX

- Support livestream production and AV workflows including audio routing, encoding, and signal management for weekly services
- Manage website content updates, media uploads, and basic site configuration while troubleshooting software issues

SKILLS

Languages: Python, C/C++, Java, TypeScript, JavaScript, SQL, Bash

Tools & Frameworks: Git, Power BI, SSMS, Node.js, React, Next.js, Tailwind CSS, OpenAI API, Spring Boot, GraphQL, Datadog

Database/Cloud: PostgreSQL, Turso/libSQL, DuckDB, SQLite, Azure DevOPS, Salesforce, Terraform, Docker, OpenSearch, Kubernetes, RAG, Vector Embeddings, LLM Integration

Interests: Basketball, Thrifting, Eating and Making Food
